Summary

As I am a passionate and skilled Full Stack Developer with more than 8 years of experience working in web development. I'm good at front-end development, especially with React. Building state-of-the-art, easy to use, user-friendly websites and applications is truly a passion of mine. I actively seek out new technologies and stay up-to-date on industry trends and advancements. I can provide a clean code and professional approach to work. In particular, I have a strong passion for React.js! I focus on making my code scalable and always stick to the rules and language syntax. At the same time, I'm an out-of-the-box thinker and capable of finding a solution for the non-typical task.

Experience

Full Stack Engineer

Ubisoft

May 2017 - Nov 2022 (5 years 7 months)
• Working on redesign and new UI & frontend components development, improvements with React/Redux, Next.js/Typescript, CSS/HTML, REST API
• Worked mostly with Implementation UI/UX components, routing and data visualization
• Complex database-related job with either relational (MySQl) and NoSQL (MongoDB) databases
• Development and maintaining new user-facing features using Javascript technologies
• Building reusable code and libraries for future use
• Optimizing application for maximum speed and scalability
• Collaboration with back-end developers and web designers to improve usability

Web Developer

WAX

Mar 2014 - May 2017 (3 years 3 months)
• I've worked on frontend development using React.js, Tailwind CSS, Node.js backend.
• I've ensured the technical feasibility of UI/UX designs for React and Angular supply chain applications.
• At that time, I've used React material ui and typescript, and to manage the global state variables,with Redux Saga/Thunk.
• And also I've integrated Restful APIs into React project using Axios libraries.

Education

The University of British Columbia

Bachelor of Computer Science, Computer Science
2009 - 2014
